

## Create a new repository from aws-bootcamp-cruddur-2023

The new repository will start with the same files and folders as [ExamProCo/aws-bootcamp-cruddur-2023](#).

Owner \*

awsmine ▾

/

Repository name \*

Great repository names are short and memorable. Need inspiration? How about [ubiquitous-computing-machine?](#)

Description (optional)

Public

Anyone on the internet can see this repository. You choose who can commit.

Private

You choose who can see and commit to this repository.

☐ Include all branches

Copy all branches from ExamProCo/aws-bootcamp-cruddur-2023 and not just main.

You are creating a public repository in your personal account.
